## SP SCAPE PANEL SYSTEM

Simple and modern design as well as a structure that allows changes to various layouts with excellent utilization of space

Light panel that is easy to install and move while saving space practically as much as the volume reduced with our lightweight panels.

06

08

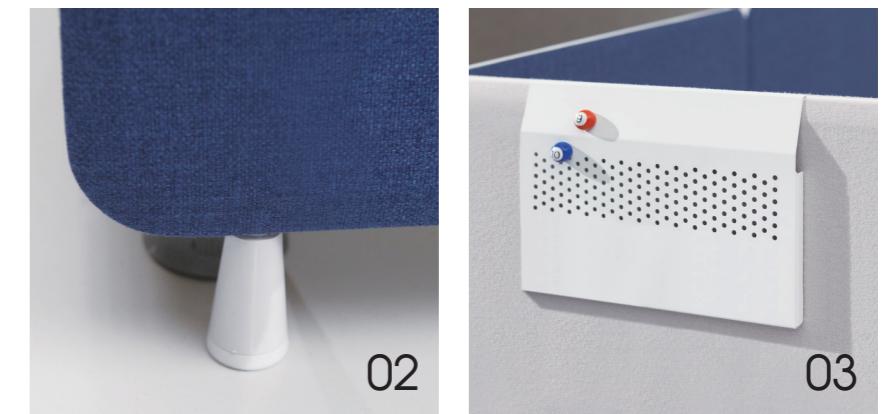

## OFFICE SPACE

A panel system that sticks to the basics for a more efficient composition and management. Reduces complex functions that are rarely used and designed to fit into any interior for a cleaner looking space.

10

**01 Edge and Post**  
Combination of clean white edges with fabrics which yield a more pleasant space.

**02 Height Adjustment**  
A plastic injection lever has been attached to the bottom to provide not only greater design perfection, but also an easier method to adjust the evenness of panels even if the floor remains uneven.

**03 Accessories**  
For accessories, the panel's upper groove can be used as a stationery prop and to attaching memos onto, etc. for more convenient use of office supplies.

14

## FREE MEETING SPACE

The SCAPE series making use of units which possess simple lines to create a space for more free communication with a system with diverse composition depending on the space provided, as well as a refined design filled with unique sensibilities.

## Detail

### POST

### TURNING BRACKET

#### Turning bracket (for Scape Board)

Applied turning bracket that allows for layouts at various angles to change the space to have more free areas.

#### Various accessories

For accessories, the panel's upper groove can be used as a stationery prop and to attaching memos onto, etc. for more convenient use of office supplies.

### SCREEN

Lightweight and simple slim screens with a slim design go well with height-adjustable desks which are being highlighted as changes offices are making to their environments, which has been a trend in the creation of healthier office environments.

## AURA PANEL SYSTEM

Unit with excellent variability, an efficient wiring system and an easy assembly system as well as disassembly

Dual structure detachable panels and frames provided as a panel system with excellent variability that can satisfy various and special work environments

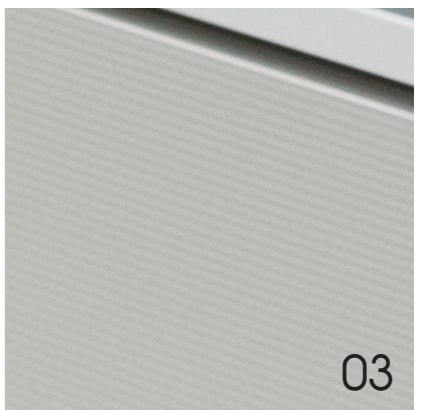

28

01

02

03

#### 01 Accessory Tile

Accessory tiles can be used to attach phone hangers, memo boxes, pencil cases, etc. to make office supply use convenient.

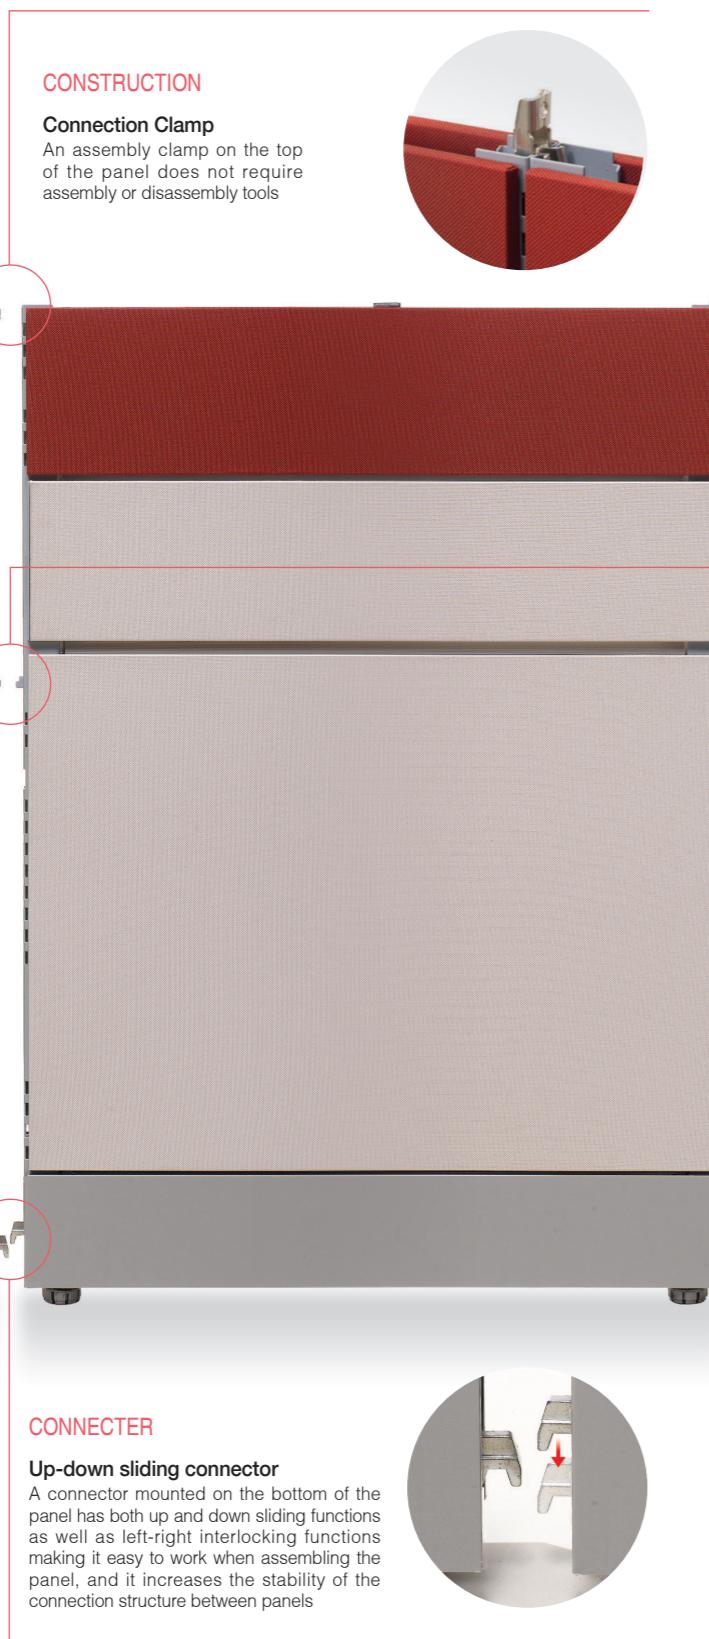

#### 02 Excellent Straightness

The assembly making use of a clamp on the upper part of the panel, leveler in the middle, and connector on the bottom provide excellent straightness when connecting multiple panels.

#### 03 Color Steel Plate Panels

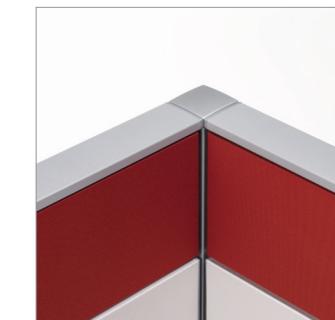

Gentle horizontal stripe patterns and refined gray toned designs create a calm and elegant mood around the office. It has excellent recyclability in addition which make it eco-friendly, and memos can be attached using magnets.

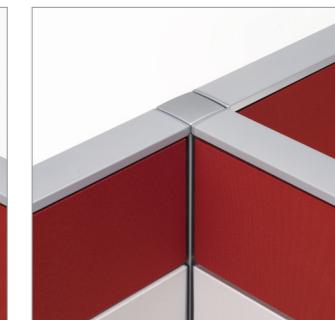

## Detail

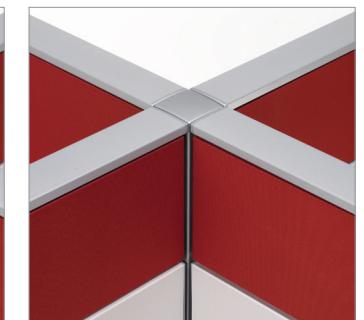

## POST

2 WAY

3 WAY

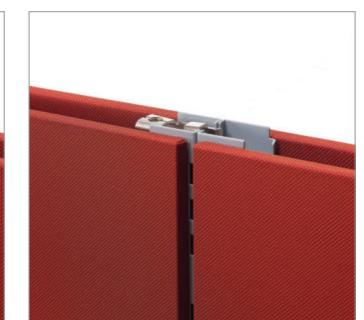

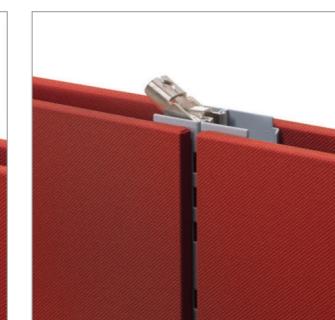

4 WAY

## ONE POST System

Using a single post, L-type, T-type and X-type panel connection is possible to shorten the overall assembly time and to reduce costs. Also, when connecting panels with different heights, panels of all heights can be connected with the tallest post for the sake of convenience.

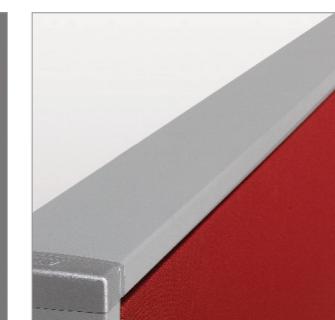

## ASSEMBLY AND DISASSEMBLY

## Easy assembly and disassembly

Assembly and disassembly can be completed even by a single person using the assembly clamp on the top of the panel that does not require any tools and the 90-degree turning connector on the bottom, thus shortening overall work time and costs for higher economic-efficiency when installing it for the first time or when moving it for installation to other areas

## LEVELLER

## AP

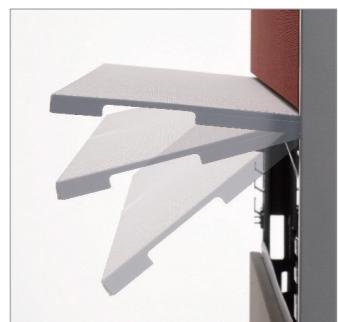

Optimized at a thickness of 66mm for the structural stability of the panel and to allow for enough space to make wiring easier

## Excellent Straightness

The assembly using the clamp on the upper part of the panel, leveler in the middle, and connector on the bottom, excellent straightness is obtained when connecting multiple panels

## Height adjustment lever

The height adjustment lever attached to the bottom of the panel is finished with a rubber material to prevent any slippage of the panel and to safely maintain panel horizontalness even if the office floor is not even

**Belt tile**

It can be fixed if the belt tile is opened to 105 degrees making labor simpler through the horizontal wiring guide while working on the belt part, so that wiring is possible even when a panel is assembled.

**Outlet + communication module**

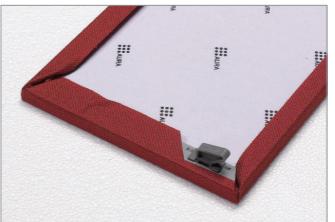

Connect four-socket power strip that has received safety certification and a communication modular to use various types of office appliances

## Detail

**STABILIZER**

**Stabilizer**

Used when connecting multiple panels in a straight line and helps maintain evenness when an office floor is not completely even by attaching a height adjustment bolt.

**Regular tile**

On the back side of regular tiles, magnets are applied on the upper part and a foldable plastic hook on the bottom provides a method to make it simple when attaching and detaching tiles on the panel frame. They can also be piled on top of each other making it convenient during packaging and transportation.

**Glass tile**

5mm thick glass assembled using vertical and horizontal frame made with ABS material

**END BAR**

**End bar**

When fixed by applying the hook on the end bar made with aluminum materials makes it sturdy and easy to attach and detach

**SHELF**

**Open shelf**

Install at various heights on the panel using brackets to use as personal storage space

## RENOPLAN PANEL SYSTEM

Modularized work station for easy and efficient assembly and disassembly with excellent durability

Block-type panel system based on honeycomb design with excellent durability and a panel system that can provide a modularized work station that request various business environments

44

Fabric: F-708, F-701, F-701  
Finish: WHITE

**MATERIAL****Panel material**

The panel has been finished with metal materials which can perform functions as a memo pads using magnets

**LEVELLER****Height adjustment lever**

The height adjustment lever attached to the bottom of the panel is finished with rubber material to prevent any slippage of the panel and to safely maintain panel horizontalness even if the office floor is not even

**CONSTRUCTION****Panel structure**

Adopted a block type finished with steel or wood materials on top of a panel structure of honeycombs to increase structural stability and panel durability

**Detail****POST**

2 WAY

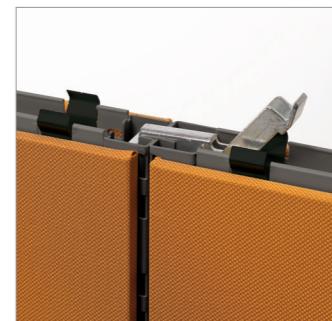

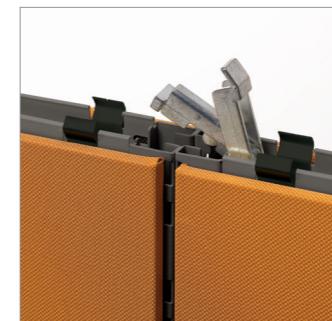

3 WAY

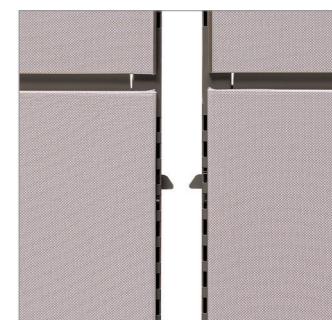

4 WAY

**ONE POST System**

Using a single post, L-type, T-type and X-type panel connection is possible to shorten assembly time and to reduce costs.

**ASSEMBLY AND DISASSEMBLY****Easy assembly and disassembly**

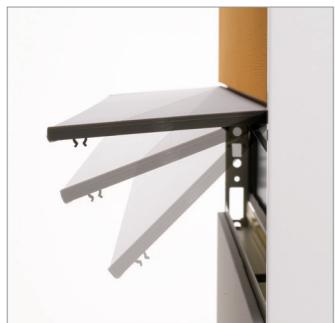

Assembly and disassembly can be completed by a single person using the assembly clamp on the top of the panel that does not require any tools and the 90-degree turning connector on the bottom, thus shortening labor time and costs thus providing more economically efficient installation of new systems or when moving the structure to be installed in another area

**CONNECTOR****Up-down 90-degree turning connector**

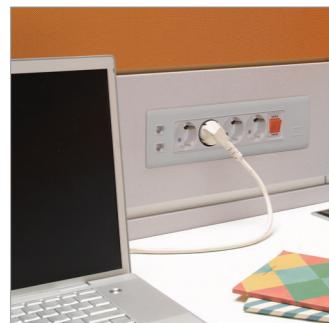

The connector mounted on the bottom of the panel has 90 degree rotation and left-right interlocking functions making it easy to work on when assembling the panel, and it increases stability of the connection structure between panels

**Easy leveling**

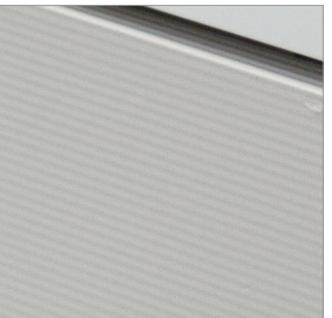

The easy grooved lever attached on the middle-side part of the horizontal maintenance frame interlocks with each other when assembling panel, and it maintains flatness and increases straightness of the panel

**Belt tile**

It can be fully fixed if the belt tile remains opened at a 105 degrees angle making labor simpler through the horizontal wiring guide while working on the belt area, so that wiring is possible even when a panel is assembled.

**Outlet + communication module**

Connect four-socket power strip that has received safety certification and a communication modular to use various types of office appliances

**Detail****STABILIZER****Stabilizer**

Used when connecting multiple panels in a straight line and it helps maintain evenness of the panel when the office floor is not even by attaching a height adjustment bolt.

**END BAR****End bar**

Applied hook method in the aluminum end bar for easy attachment and detachment

**SHELF****Open shelf**

Install at various heights in panel using brackets to use as personal storage space

**Color Steel Plate Panels**

Gentle horizontal stripe patterns and refined gray tone color designs create a calm and elegant office mood. It also has excellent recyclability making it eco-friendly, and memos can be attached using magnets.

## ECONOPLAN PANEL SYSTEM

**Outstanding fiscal effectiveness and optimized spatial utilization for simple and efficient assembly and disassembly**

Adopted 45mm thickness to procure structural stability of panels to maximize economic efficiency as a panel system that allows efficient use of office space

Fabric: F-707A, F-701  
Finish: WHITE

60

Fabric: F-704A, F-705A  
Finish: DARK GRAY

62

**SLIM DESIGN****EP**

Adopted 45mm slim design to improve the utilization of office space and finished the panel sides with steel bars to allow for better structural stability

**CONNECTER****Up-down 90-degree turning connector**

The connector mounted on the bottom of the panel has a 90-degree rotation and left-right interlocking functions making it easy to work on when assembling panels, and it increases the stability of the connection structure between panels

**MATERIAL****Panel material**

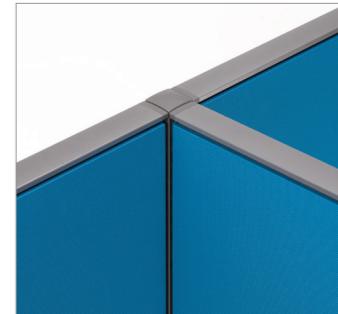

The panel finished with metal materials can perform the function of acting as a memo pad when using magnets

**LEVELLER****Height adjustment lever**

A height adjustment lever attached to the bottom of the panel is finished with a rubber material to prevent any slippage of the panel and to safely maintain panel horizontalness even if the office floor is not even

**Detail****POST**

2 WAY

3 WAY

4 WAY

**ONE POST System**

Using a single post, L-type, T-type and X-type panel connections are possible to decrease the overall assembly time and to reduce costs through this. Also, when connecting panels at different heights, it is convenient as panels of all heights can be connected with the tallest post.

**FND RAR****End bar**

A hook on the end of the bar is present to easy attachment and detachment. It is made of lightweight aluminum.

**Simple assembly and disassembly**

Assembly and disassembly can be completed by a single person using the assembly clamp on the top of the panel which does not require any tools with the aid of the 90-degree turning connector on the bottom, thus shortening labor and costs for highly economic-efficiency when installing new or when moving it for installation in other areas

**Excellent Straightness**

Assembly using the clamp on the upper part of the panel, leveler in the middle, and connector on the bottom provides excellent straightness when connecting multiple panels

**Open shelf**

When an open shelf cannot be attached to the top of a desk due to restrictions of panel height, it can be attached to the bottom to procure more storage space

## STABILIZER BRACKET

### SCREEN PANEL SYSTEM

Can be installed easily and its vision blocking effect improves work concentration levels

It can easily be installed when office space does not usually permit installation, and its vision blocking effect can help improve work concentration levels. Also, memos can be attached using magnets.

## SCREEN

It can be installed easily when partitions cannot be installed due to restrictions of office space, and its vision blocking effect can help improve work concentration levels. Also, a magnet can be used for use as a memo board

### Detail

#### Simple Finish

An energizing process is performed on high quality plastic mold caps, strips and strong and lightweight aluminum frame for simple and refined finish

#### Screen bracket

Made with a structure that can strongly fix screens by being installed on the bottom part of the desk

### POST

#### ONE POST System

L-type, T-type and X-type screen can be connected using a single post
